

Appendix Master Applied Mathematics

Appendix I Teaching outcomes of the degree programme (art. 1.3)

The degree programme aims to train the students in such a way that they acquire the insight, skills and knowledge that allows the recipient of the degree to establish a professional career in the field of Applied Mathematics.

Appendix II Specializations of the degree programme (art. 2.2)

The degree programme has the following specializations:

- Computational Science and Numerical Mathematics
- Systems, Control and Optimization

Appendix III Content of the degree programme (art. 2.3)

The degree programme has the following specializations:

- Computational Science and Numerical Mathematics
- Systems, Control and Optimization

The master programme comprises 120 ECTS.

The requirements on the programme are the following.

<i>Parts</i>	<i>Constraints</i>	<i>ECTS</i>
Student colloquium		5
At least five modules from the list of modules given at the University of Groningen, the modules in the specialization area are compulsory	<p><i>Specialization Computational Science and Numerical Mathematics :</i></p> <ul style="list-style-type: none"> - Computational Fluid Dynamics (annual) - Computational Engineering (every two years , 2012-2013) - Boundary Layers (every two years, 2013-2014) <p><i>Specialization Systems, Control and Optimization:</i></p> <ul style="list-style-type: none"> - Robust Control (annual) - Modeling and Identification (every two years, 2012-2013) - Modeling and Control of Complex Nonlinear Engineering Systems (annual) 	≥ 25

	<p><i>Specialization Algebra and Geometry (Mathematics):</i></p> <ul style="list-style-type: none"> - Caput Algebra and Geometry (annual) - Geometry and Topology (annual, first time in 2013-2014) <p><i>Specialization Dynamical Systems and Analysis (Mathematics):</i></p> <ul style="list-style-type: none"> - Dynamical Systems and Chaos (annual) - Caput Dynamical Systems (every two years, 2012-2013) - Caput Mathematical Physics (every two years, 2013-2014) - Hamiltonian Mechanics (annual, first time as mastermath videocourse in 2012-2013) <p><i>Specialization Statistics and Probability (Mathematics):</i></p> <ul style="list-style-type: none"> - Contemporary Statistics with Applications (every two years, 2012-2013) - Statistical Genomics (every two years, 2013-2014) 	
At least three modules from the Mastermath programme	<p>From these modules at least two have to be in the specialization area and at least one has to be outside the specialization area.</p> <p>For information on the modules of the Mastermath programme see: www.mastermath.nl</p>	≥ 18
Advanced modules of programmes taught at the University of Groningen other than the master mathematics and applied mathematics	<p>These modules have to be of at least third year bachelor level, and have to be relevant for the master Mathematics (at the discretion of the exam committee).</p>	≥ 10
Free choice		≤ 5
Final Research Project	<p>Research project in the specialization area. An internship of at least 15 ECTS is part of this project.</p>	50

The Mathematics and Applied Mathematics modules given at the University of Groningen are

module	offered	ECTS	assessment	practical
Caput Algebra and Geometry	annual	5	Take home exam followed by an oral discussion of the problems	
Geometry and Topology	annual	5	Written examination	
Boundary Layers	every two years	5	Oral examination	x

Caput Dynamical Systems	every two years	5	Oral presentation, essay	
Caput Mathematical Physics	every two years	5	Oral presentation, essay	
Computational Engineering	every two years	5	Assignments, oral presentation	
Computational Fluid Dynamics	annual	5	Assignments, oral examination	x
Contemporary Statistics with Applications	every two years	5	Homework, final project, examination	
Dynamical Systems and Chaos	annual	5	Oral presentation, essay	
Hamiltonian Mechanics	annual	5	Homework, Oral presentation, essay	
Final Research Project	annual	50	Assessment of performance, report, oral presentation	
Mathematical Research Project	annual	30	Assessment of performance, report, presentation	
Modeling and Identification	every two years	5	Take home exams followed by an oral discussion of the problems	
Modeling and Control of Complex Nonlinear Engineering Systems	annual	5	Homework, written examination	
Robust Control	annual	5	Take home exam followed by an oral discussion of the problems	
Statistical Genomics	every two years	5	Homework, final project, examination	
Student Colloquium	annual	5	Oral presentation, article	

For information on the modules of the Mastermath programme see <http://www.mastermath.nl>.

For information on the modules of programmes of the University of Groningen other than the master programmes mathematics and applied mathematics see the teaching and examination regulations of the corresponding programme.

Appendix IV Optional modules (art. 2.4)

See Appendix III.

Appendix V Entry requirements and compulsory order of examinations (art. 3.2)

For students admitted to the programme there are no entry requirements for the individual modules.

Appendix VI Admission to the degree programme and different specializations (art. 4.1.1 + art. 4.2)

Holders of the following Bachelor's degree from the University of Groningen are considered to have sufficient knowledge and skills and will be admitted to the Master's degree programme in Applied Mathematics:

- BSc Mathematics
- BSc Applied Mathematics
