Appendix I

Learning outcomes of the Bachelor's degree programme (Article 3.1.1)

Graduates are able to:

1. Explain general basic principles of biology and describe how they relate to each other;
2. Estimate the relevance of research results in one or more areas of biology published in academic journals and discuss these results with peers;
3. Describe fundamental and/or applied scientific research and recognize areas of interest within it;
4. Describe the relationship between various disciplines and integrate terms and concepts from the subject areas;
5. Recognise and analyse scientific problems, and design a scientific/academic approach to them in a systematic manner.
6. Under supervision, formulate a research hypothesis or propose a research design within their own discipline, and possess sufficient practical skills to conduct the research themselves;
7. Explain the societal relevance of the discipline, evaluate the related responsibilities and judge their individual role in that context.
8. Develop a work method independently and proactively, justify it, and carry it out in order to achieve a specific aim;
9. Contribute to and take responsibility for solving a specific problem or task in a specific role as part of a team;
10. Report about research in a structured manner, both orally and in writing;

The degree programme also offers the student:

11. To explore career opportunities and opportunities for follow-on degree programmes.

Appendix II Majors and Minors of the degree programme (Article 3.7.4)

The degree programme has the following Major(s):

- Behaviour and Neurosciences (BN)
- Biomedical Sciences (BMS)
- Ecology and Evolution (EE)
- Integrative Biology (IB)
- Molecular Life Sciences (MLS)

The degree programme has the following Minor(s):

- Minor Biomedical Life Sciences
- Minor Ecology & Evolution

Students can also participate in:

- Faculty minor programmes;
- University minor programmes
 - The minor programme “Neuroscience” is not accessible for students from the Bachelor’s degree programme Biology
- Minor programmes at other national universities;
- Minor programmes at international universities.

Appendix III Course units in the propaedeutic phase

- List of course units; Article 4.1.1
- Compulsory order of examinations; Article 9.3

First semester (all majors):

Course unit name	Course code	ECTS	Entry requirements
Basic Cell and Molecular Biology	WBBY001-05	5	n/a
Biostatistics 1	WBBY014-05	5	n/a
First Year Symposium	WBBY017-02	2	n/a
Genetics, Ecology & Evolution	WBBY005-05	5	n/a
Lab Course	WBBY021-03	3	n/a
Microbiology	WBBY022-05	5	n/a
Physiology	WBBY011-05	5	n/a

Second semester:

Majors Behaviour and Neurosciences, Biomedical Sciences, Molecular Life Sciences

Course unit name	Course code	ECTS	Entry requirements
Behavioural Neurosciences	WBBY026-05	5	n/a
Cell Biology and Immunology	WBBY033-05	5	n/a
Metabolism	WBBY058-05	5	n/a
Molecules of Life	WBBY047-05	5	n/a
*Research Skills in Life Sciences 1	WBBY066-02	2	Yes (see Art. 4.4.1.)
*Research Skills in Life Sciences 2	WBBY067-03	3	
*Research Skills in Life Sciences 3	WBBY068-05	5	

Major Ecology & Evolution

Course unit name	Course code	ECTS	Entry requirements
Behavioural Neurosciences	WBBY026-05	5	n/a
Biochemistry and Cell Biology in Ecology and Evolution	WBBY029-05	5	n/a
Ecophysiology of Plants and Animals	WBBY052-05	5	n/a
Evolutionary Ecology	WBBY038-05	5	n/a

Appendix IV Course units in the post-propaedeutic phase

- List of course units; Article 7.1.1
- Compulsory order of examinations; Article 9.3

4.1. Major-specific requirements

The post-propaedeutic phase is composed of 90 ECTS major-specific course units (described below for each major), plus a minor programme of 30 ECTS.

Students who have not completed the propaedeutic phase are not allowed to enroll for more than 15 ECTS in one period (e.g. period 1a) including re-examinations. Students who have not passed first-year courses need to prioritise these when enrolling for second-year courses.

4.1.1. Major Biomedical Sciences

Compulsory course units (50 ECTS)

4.2. Minor programmes

Minors in the Life Sciences

The Bachelor's degree programme Biology offers its students two minors within the Life Sciences.

- Minor Biomedical Life Sciences

Accessible to students following the major EE.

Course unit name	Course code	ECTS	Entry requirements
Bioinformatics or Chronobiology	WBBY002-05 WBBY003-05	5	n/a n/a
Host-Microbe Interactions	WBBY013-05	5	n/a

*Systems Ecology & Ecological Interactions 2	WBBY071-05	5	Yes (see Art. 4.4.3.)

University minor "Neuroscience"

The Bachelor's degree programme Biology is also responsible for the University minor "Neuroscience". This minor is not accessible to students from the Bachelor's degree programme Biology

Course unit name	Course code	ECTS	Entry requirements
Neuroscience	WBBY009-15	15	n/a
*Behavioural Neuroscience	WBBY010-15	15	Yes (see Art. 4.4.8.)

4.3. Courses with one or several practical components

The course units listed in Appendix IV have a strong integration of practicals, lectures, and tutorials. Course units where the final assessment is not solely through a written exam are assessed through practicals. For further information, see OCASYS.

¹ Whether the minor is accessible to students from the major IB depends on their choice of electives in semester 1, Year 2.

4.4. Compulsory order of examinations

All course units in the curriculum are accumulative and assume knowledge, insight and skills to have been obtained in previous course units. Any deficiencies should be repaired as soon as possible.

Courses with specific entry requirements have been provided with a * in Art. 4.1.

4.4.1. Research Skills in Life Sciences 1, 2, and 3

This course unit (10 ECTS) consists of three different parts with separate course codes. Students are obliged to follow all three parts at the same time. Students cannot follow a part individually (except for resits).

4.4.2. Research Skills in Ecology and Evolution 1, 2, and 3

This course unit (10 ECTS) consists of three different parts with separate course codes. Students are obliged to follow all three parts at the same time. Students cannot follow a part individually (except for resits).

4.4.3. Systems Ecology & Ecological Interactions 1 & 2

Participation in the course “Systems Ecology & Ecological Interactions 1” is an entry requirement for participation in the course “Systems Ecology & Ecological Interactions 2”. An exception is made for students for whom the old curriculum course “Systeemecologie” is compulsory in their major.

4.4.4. Evolutionary Processes

Successful completion of the course “Genes & Evolution” is an entry requirement for participation in the course “Evolutionary Processes”.

4.4.5. Ecological and Evolutionary Modelling

Successful completion of the course “Modelling Life” is an entry requirement for participation in the course “Ecological and Evolutionary Modelling”.

4.4.6. Research Projects

All students need to have obtained the following entrance conditions before being able to start a major-specific Research Project in year 3 of the Bachelor’s programme:

- 90 ECTS
- Including the propaedeutic phase of the Bachelor’s programme Biology,
- Excluding the minor programme (30 ECTS).

Students can only follow the research project(s) of their chosen major programme. A student is excluded from participation in a major-specific research project when the student has already completed the research project(s) of another major programme. Consequently, students cannot graduate with two major programmes.

4.4.6.1. Students in the major Ecology & Evolution

In order to start a Research Project, students in the major Ecology & Evolution need to have followed the course Biostatistics 2.

4.4.6.2. Students in the major Integrative Biology

Students who want to follow a Research Project within the research area of ecology or evolution need to have followed the course Biostatistics 2.

4.4.7. Bachelor’s Thesis

All students need to have obtained the following entrance conditions before being able to start the Bachelor’s Thesis:

- Students must have completed all course units from the propaedeutic phase,
- Students must have earned at least 60 ECTS from the post-propaedeutic phase.

4.4.8. University minor "Neuroscience"

Participation in the course Neuroscience is an entry requirement for participation in the course Behavioral Neuroscience. This entry requirement does not apply to students of Medicine and Human Movement Sciences.

Appendix V Admission to the post-propaedeutic phase (Article 6.1.1)

The following candidates will be admitted to the post-propaedeutic phase:

- a. Students who have been issued a positive study advice from the bachelor degree programme Biology.

Students who have been issued a positive study advice from another degree programme will be assessed by the Admission's Board.

Appendix VI Contact hours propaedeutic and post-propaedeutic phase (Article 3.6)

8.1. Information about contact hours

The contact hours in the propaedeutic and post-propaedeutic phase in the bachelor Biology depend on the chosen major and the chosen course units throughout the bachelor programme. Students can expect an average of contact hours as listed below.

Degree programme year 1	
Structure contact hours	Average contact hours per year
Lectures	270
Tutorials	150
Practicals	200
Examinations	32

Degree programme year 2	
Structure contact hours	Average contact hours per year
Lectures	336
Tutorials	98
Practicals	183
Examinations	36

Degree programme year 3 (excl. minor programme)	
Structure contact hours	Average contact hours per year
Lectures	53
Tutorials	47
Practicals	250
Examinations	6

Appendix VII Additional Requirements Open degree Programmes (Art. 7.3)

Students who wish to pursue an open degree programme will have to file a request with the Board of Examiners. Any additional requirements to the open degree programme will be determined by the Board of Examiners and Programme director of the Bachelor's degree programme Biology.

Appendix VIII Transitional provisions (article 12.1)

Transitional arrangement for the Bachelor degree programmes Biology and Life Science & Technology (cohort 2017 and earlier)

11.1. Course units that are no longer part of the Biology curriculum as of 2022-2023

The course units in the first column are no longer part of the curriculum. These will be replaced by course units in column “Alternative options in 2022-2023”. The extensive table can be found on the next pages.

There are several course units in the new curriculum that have been provided with a new course title. However, some of these course units have the same content as a course unit in the old-curriculum. Therefore, students are not allowed to include the following course units next to each other in their individual course programme.

- Students who have passed the course unit "Medische Biologie en Moleculaire Biologie" are not allowed to follow the course unit "Epigenetics & Gene-editing".
Exception to this rule: students are allowed to have both course units in their course programme when both course units have been followed in academic year 19/20.
- Students who have passed the course unit “Medical Microbiology / Medische Microbiologie” are not allowed to follow the course unit "Microbes and Infection".
- Students can only enroll for the last chance exam(s) when they have already followed the lectures and practicals of the old curriculum course. Students can only enroll for the alternative course(s) when they have not followed the lectures and practicals of the old curriculum course.

11.2. Research project “Medische Farmaceutische Wetenschappen”

Students who follow the old-curriculum major Medisch Farmaceutische Wetenschappen (LST) and still have to complete a research course / project will have to contact the academic advisors. These students will be provided with an individual assignment via the bachelor degree programme Pharmacy.

			* Students who follow the old-curriculum major Medisch Farmaceutische Wetenschappen and still have to complete a research course / project will have to contact the academic advisors. These students will be provided with an individual assignment via the bachelor degree programme Pharmacy.				
			1. Students can only enroll for the last chance exam(s) when they have already followed the lectures and practicals of the old curriculum course. 2. Students can only enroll for the alternative course(s) when they have not followed the lectures and practicals of the old curriculum course.
